Summary of Non-Compliances

If a program disagrees with a licensing finding, the program may request a review of the finding(s). Ohio Administrative Code 5180:2-12-03, 5180:2-13-03, 5180:2-19-10 and 5180:2-20-02 detail the process for submitting a request for review. The request for review must be submitted within ten business days from the receipt of the licensing report. In addition, if the program is Step Up To Quality rated, the rating may be impacted if a serious or moderate risk non-compliance is cited.

Domain: **01 Ratio & Supervision**

Rule: 5180:2-12-18 Ratio

Requirement: The program is required to maintain the appropriate staff to child ratio for each group served.

Finding: During the inspection, required staff/child ratios were not maintained for different groups on multiple occasions, as noted below:

The ratio determined for the Infant group was 1 Child Care Staff Member for 6 children (group included young infants). Additionally, a ratio of 1 Child Care Staff Member for 12 children was determined for the toddler group (which included an older infant during nap time where children were observed to be awake and moving all over the room). A ratio of 1 child care staff member for 9 children was observed in the transition room at naptime when children were still awake and moving around the classroom.

Additional staff members must be hired or current Child Care Staff Members must be rescheduled to maintain compliance. Provide staff training. Submit the program's corrective action plan, which includes a statement that training was provided, to the Department to verify compliance with the requirements of this rule.

Finding: "During the inspection, toxic substances were stored in the Infant room (on a low shelf in an unlocked cabinet) in the Toddler room (on the edge of the counter), and in the Transition room (in the teacher's unlocked locker) where children had access to it.

The following was observed: several cleaning agents were found to be accessible to children, including PineSol, Clorox Disinfecting spray, Isopropyl Alcohol, and a sanitizing spray. There were also disinfecting wipes stored under the sink in an unlocked cabinet in the kitchen between the infant and toddler rooms where children were observed to be playing.

Provide staff training. Submit the program's corrective action plan, which includes a statement that the potentially hazardous substance or item is no longer accessible to children and/or children will not be outside when machinery is in use and a statement that training was provided, to the Department to verify compliance with the requirements of this rule."
